and 42-55.

Please amend the claims as follows:

7. (Once Amended) A machine readable medium on
which is recorded a utility program which can be started
up in a linked manner by an application program capable
of giving a print command to an image forming apparatus
connected to a network, said utility program comprising:

a display step for displaying on a display means
locations of image forming apparatuses connected to said
network; and

a select step for selecting as an output destination
an image forming apparatus corresponding to a thus
displayed location which is designated by a user,
